

A Quick Overview of Flowchart symbols

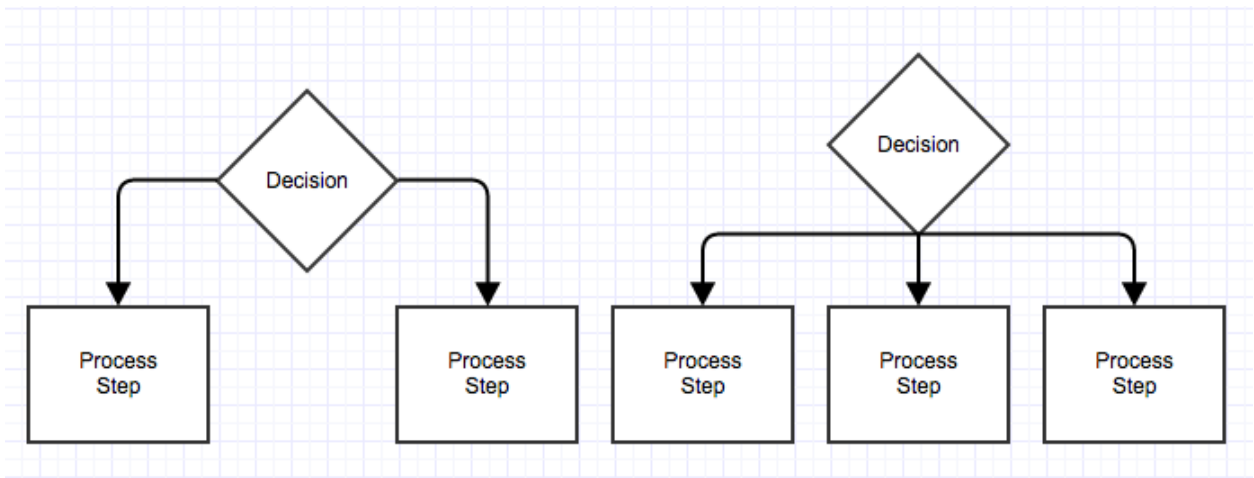

Created by a volunteer at EqualityMath.com.

Arrow: guides the flow of information

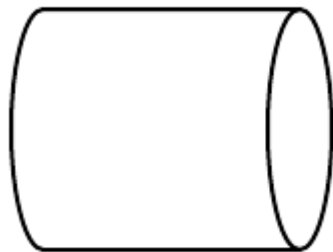

Diamond: implies that a decision has to be made

Symbol for Documentation

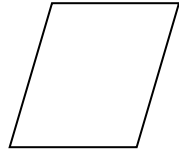

Database Symbol

Hard Disk Symbol:

Input/Output use a parallelogram

An example that uses many of these symbols

Following is the flowchart for a speech recognition engine that takes speech input and process it either locally or sends it to a bigger compute resources on the web and these resources are termed as cloud servers. Local processing is possible with a desktop or a powerful laptop. Cell phones, typically send the audio input to cloud servers.
